

Thread Forming Screw For Metal

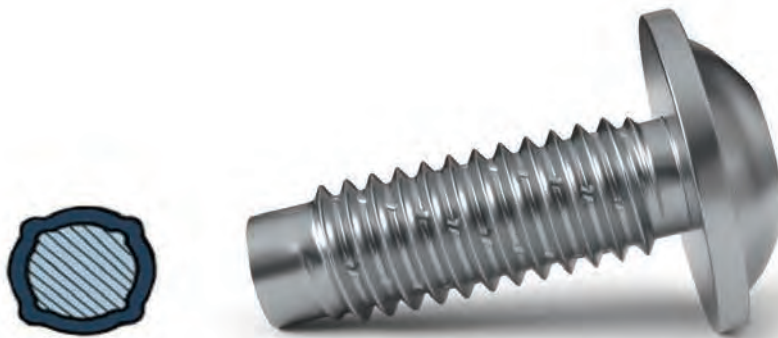

## FIX-SPF SCREW

**TEK**FIX  
FASTENING SOLUTIONS

A low thread forming torque provides secure, one step installation for steel and high-grade steel joints.

The specially engineered female thread creates a high strength joint that also provides optimum resistance against self-loosening through dynamic stress.

### FEATURES AND BENEFITS

- Suitable for assemblies to **DIN 7500**
- Low thread forming torque
- Thread corresponds to metric standard ISO DIN13
- High strength and maximized flank overlap

#### Typical Applications:

- Fastening of containers
- Fastening of car roof systems
